

Model 07.3005

Bucket Seat Mounting Bracket for Vehicles with Hook-In Seats

Suggested for 07.0200, 07.0300 and 07.0400 Equipment Racks

Designed for the Chevrolet Impala, this Bucket Seat Mounting Bracket enables the installation of **SHO-ME**® Equipment Racks between bucket seats without drilling any holes.

NO DRILL Installation Instructions

1. Position the short side of one bracket against the inside of one leg of the Equipment Rack. The long side of the bracket with the square hole should extend outwards.
2. Bolt the bracket and Equipment Rack together using the supplied hardware.
3. Repeat steps 1 and 2 using the remaining bracket on the other side of the Equipment Rack.
4. If the equipment is mounted in the Equipment Rack, you are now ready to mount the brackets to the floor.
5. Remove the rear bolts from both bucket seats. Lift out the seats taking into account that the front seat legs hook into the floor of the car body.
6. Center the equipment rack over the hump.
7. Line up the square hole in the 07.3005 bracket with the holes in the floor where the front of the seats attach.
8. Re-install the seats by hooking the front seat legs through the 07.3005 brackets and into the floor of the car.
9. Tighten the rear seat bolts securely.

PARTS LIST

1. (2) Angle Brackets
2. (4) 1/4" x 1/2" Bolts
3. (4) 1/4" Keps Nuts
