INSTALLATION INSTRUCTIONS

Use the L- brackets (included) to mount the light. Slide the hex bolts provided into the t-slot as shown in the Figure A below. The light can be mounted using the bottom or rear t-slots. Always mount with the bottom t-slot down, this is to allow any moisture that enters the light housing to drain properly.

WIRING INSTRUCTIONS

Black wire to Ground, Red wire to Positive +12V. Yellow wire activates the signal stick in a Random Flash Pattern when +12v is applied. When operating signal stick with controller, All Signal Stick functions will override the Random Flash.
