# Warble / Whoop Dash Mounted ELECTRONIC SIREN

Model 30.2330  
(WW2)

This compact siren system is perfect for mounting in vehicles with very little room under the dash. The streamlined amplifier powers one 100 watt RMS speaker. It houses a lighted power switch and a lighted mode switch for convenient selection of either the WARBLE or the WHOOP mode.

## INSTALLATION OF THE POWER AMPLIFIER

Select a location under the dash that is suitable for installation of the amplifier - free from moisture, heat and abuse. The selected area should permit ease of operation and must not interfere with normal operation of the vehicle or deployment of any airbag(s).

Using the amplifier bracket as a template, mark the location of the mounting holes. Drill holes at these locations, then install the amplifier with the mounting screws provided.

CAUTION! All installations are the sole responsibility of the buyer. **Do not mount the amplifier in the engine compartment.** Make sure all wiring is run so that water cannot reach the siren by following the path of the wire.

## SPEAKER CONNECTIONS

Use only one 100 watt speaker with an 11 ohm impedance. Connect the speaker to the amplifier using the 16-2 (two conductor) wire provided. When mounting any speaker, make certain that its drain hole is positioned at the bottom of the installation in the 6 o'clock position.

## POWER INPUT CONNECTIONS

Connect the supplied 14 gauge BLACK wire leading from the amplifier to a ground location. (The negative terminal of the battery is the preferred ground location.)

Locate the 14 gauge RED wire leading from the amplifier and connect it to a +12 volt source. (The vehicle battery is the preferred source for +12V.)

The amplifier comes complete with a factory-installed **internal** 20 amp fuse.

## WARRANTY

Model 30.2330 has a two year warranty covering parts and labor. Merchandise returned under warranty shall be subject to factory inspection and repaired, replaced, or credited at the discretion of Able 2 Products Company, Inc. Water, condensation or negligence will **VOID** this warranty.
